

- NOTES:
- 1) B (+) power supply
  - 2) Signal path (NARROW)
  - 3) The voltage is the reference value measured with a tester (20 k-ohms/V DC when there are no signals. But ( ) is with NARROW, and ( ) is with NORMAL. The voltage with no designation have a NORMAL and a tolerance of ±5%.
  - 4) Capacitors with no designation have a dielectric strength of less than 500V.
  - 5) The only capacitor tolerances indicated are ±5% (J) and ±10% (K).
  - 6) Dynamic capacitor symbols:
    - (C) High dielectric constant system (Y, YP, YZ)
    - (H) For temperature compensation (SH)
  - 7) Explanation of symbols:
    - (P) Mylar capacitor
    - (PP) Polypropylene film capacitor
    - (PC) Polystyrene capacitor
    - (C) Ceramic capacitor
  - 8) Safety component symbol

This symbol is given to important parts which serve to maintain the safety of the product, and which are made to conform to special safety specifications. Therefore, when replacing a component with this symbol, make sure you use a designated part. This component is not a standard component without notice in the interests of improved performance.

AC 100-200V/50/60Hz
